

PATIENT PROFILE MANAGEMENT

Keep your pharmacy records updated
with RxCatalyst.

It's time to stop being overwhelmed by data and administrative work. We can help you manage a centralized registry of patient data and make your pharmacy software look exactly as needed.

This service can help you:

- Keep patient records updated.
- Have an organized, accurate, and secure registry.
- Reduce the time spent on phone calls and faxes.
- Minimize inconsistencies in the patient's data.
- Retrieve and transfer patient data faster.
- Have a smoother workflow in your pharmacy.

PROCESS PRESCRIPTIONS FASTER BY LETTING US ORGANIZE, ADD, AND UPDATE PATIENT DETAILS, PROVIDER DETAILS, AND INSURANCE DETAILS FOR YOU.

Register New Patients

Our remote staff review a new patient's relevant documents, obtain the required information, and accurately enter all necessary data in your pharmacy software.

Monitor Relevant Data

We keep track of other pertinent patient details such as allergies, illnesses, vices, and current medication that could determine and prevent possible drug interactions.

Collect Patient Information

Our HIPAA-certified staff contact patients and applicable facilities to collect information that is needed to update your pharmacy's records.

Ensure Accuracy and Security

When we receive an update for the patient's data, we double-check the information, compare it with the information in your software, and then make the required changes.

This is just one in our family of services.
