

PRESCRIPTION DATA ENTRY

RxCatalyst can help you digitize all of your pharmacy's prescription data.

Our team of HIPAA-certified remote pharmacists take the prescriptions that you receive and add them to the patients' records in your software.

This service can help you:

- Streamline your pharmacy's prescription process.
- Dispense prescriptions faster.
- Accommodate more prescriptions in a day.
- Have a paperless workflow.
- Track a patient's prescriptions efficiently.
- Organize patient's prescription information in your pharmacy software.

TAKE FULL ADVANTAGE OF OUR REMOTE STAFF AND INCREASE YOUR PHARMACY'S EFFICIENCY.

Transfer Prescription Data to Your EMR

Our remote staff quickly and accurately enter the prescription data on your pharmacy software, so all that's left for you to do is check the details and then dispense the medications.

Keep Patient Data Up-to-Date

We can help you maintain an updated record of all of your patients' past and present prescriptions.

Comply with U.S. Pharmacy Rules

Our remote staff are well versed with how U.S. pharmacies work. We completely adhere to the applicable government-mandated guidelines and measures for handling prescription.

Ensure Accuracy and Reliability

To avoid errors in dispensing and processing prescriptions, all of the prescription data that we enter undergo intensive quality assurance.

On-Time Delivery

We make sure that the prescriptions that we process are readily available when you need them.
