

RECORDS MANAGEMENT

Find the information that you need
faster with RxCatalyst.

Guided by your clinic's standard operating procedures, our remote staff add, organize, and update your patients' and doctors' records and make them easier to review.

This service can help you:

- Organize pharmacy operations.
- Check and track information efficiently.
- Process more prescriptions in a day.
- Speed up your prescription process.
- Address prescription concerns faster.
- Maintain concise and accurate records.

SIMPLIFY YOUR WORKLOAD AND MAINTAIN THE ACCURACY OF YOUR PHARMACY'S RECORDS.

Manage Your Data

By reviewing and organizing your doctors' records, our remote staff can efficiently route all requests and concerns to the right doctor and speed up your pharmacy workflow.

Customize Your Record Organization

We go over your patients' and doctors' records and organize them to suit your preferences.

Keep Data Safe

All of your records are securely stored in our pharmacy software and they can be compared with the ones in the NPI registry and the Surescripts database.

Handle Information Securely

Our services are HIPAA compliant. Our remote staff are well-trained in various government-mandated guidelines and measures for health care and prescriptions.

We offer more services for pharmacies of all shapes and sizes:
