

# TAR MANAGEMENT

Help patients get the treatment that they need faster!

Let our dedicated team of experienced pharmacists handle incoming Treatment Authorization Requests (TAR) for you.

## This service can help you:

- Process TAR requirements faster and more efficiently.
- Maximize your pharmacy's time and resources.
- Address patients' medical needs faster.
- Resolve prescription concerns faster.
- Reduce the need to hire more on-site staff.

# STREAMLINE YOUR PHARMACY'S TAR APPLICATION PROCESS.

## Generate and Send TARs

To help your pharmacy process prescriptions that require prior authorization, our remote staff can generate TARs and send them to the appropriate prescribers and insurance carriers.

## Handle Information Securely

Our HIPAA-certified staff consistently adhere to the applicable government-mandated guidelines and measures in exchanging patient-related records.

## Record Denied Claims

When a TAR is rejected, we annotate the prescription information in your pharmacy software and promptly inform the patient, prescribing doctor, and appropriate facility about the rejection. We can also review the necessary prescription details at your request.

## Ensure Accurate TAR Processing

Our remote staff double-check the TARs that you receive and properly apply them to the correct patients and prescriptions.

## Facilitate the TAR Process

By communicating with the applicable parties, we can attend to and follow up on your pharmacy's TAR applications.

## Hold on, we're just getting started.
